

Problem 2 - The Lift

The problem for exam preparation for the [Programming Fundamentals Course @SoftUni](#).
Submit your solutions in the SoftUni judge system at <https://judge.softuni.org/Contests/Practice/Index/2517#1>.

Write a program that **finds a place for the tourist on a lift**.

Every wagon should have a **maximum of 4 people on it**. If a wagon is full, you should direct the people to **the next one with space** available.

Input

- ☐ On the first line, you will receive **how many people** are waiting to get on the lift
- ☐ On the second line, you will receive the **current state of the lift separated by a single space: " "**.

Output

When there is **no more available space left on the lift**, or there are **no more people in the queue**, you should print on the console the final state of the lift's wagons separated by " " and one of the following messages:

- ☐ If there are no more people and the lift has empty spots, you should print:
**"The lift has empty spots!
{wagons separated by ' '}'"**
- ☐ If there are still people in the queue and no more available space, you should print:
**"There isn't enough space! {people} people in a queue!
{wagons separated by ' '}'"**
- ☐ If the lift is full and there are no more people in the queue, you should print only the wagons separated by " ".

Examples

Input	Output
15 0 0 0 0	The lift has empty spots! 4 4 4 3
Comment	
First state - 4 0 0 0 -> 11 people left Second state - 4 4 0 0 -> 7 people left Third state - 4 4 4 0 -> 3 people left	
Input	Output
20 0 2 0	There isn't enough space! 10 people in a queue! 4 4 4
Comment	
First state - 4 2 0 -> 16 people left Second state - 4 4 0 -> 14 people left Third state - 4 4 4 -> 10 people left, but there're no more wagons.	

JS Examples

Input	Output
["15", "0 0 0 0 0"]	The lift has empty spaces! 4 4 4 3 0
Comment	
First state - 4 0 0 0 -> 11 people left Second state - 4 4 0 0 -> 7 people left Third state - 4 4 4 0 -> 3 people left	
Input	Output
["20", "0 2 0"]	There isn't enough space! 10 people in a queue! 4 4 4
Comment	
First state - 4 2 0 -> 16 people left Second state - 4 4 0 -> 14 people left Third state - 4 4 4 -> 10 people left, but there're no more wagons.
